Pre and Post examination activities include activities right from release of advertisement in consultation with the client, Data Processing, scrutiny of applications, providing list of eligible and ineligible candidates, sending of admit cards, setting & printing of Question paper and OMR, holding of examination and timely submission of result to the client organization as per the parameters given.

Technology for Assessment Delivery with quick and accurate results (Our online and on-site assessment delivery facility makes us different from others.)

Technology, Management , Tablet Delivery Solutions , On-Campus computer based tests , Large volume Assessment Delivery , Internet Based Delivery.

Auto-Proc - contain main features i.e. - Video Monitoring, Audio Monitoring, Live Streaming, Geographic Tagging

Video Monitoring: This ensures monitoring the candidate at intermittent intervals. Pictures are correspondingly logged for reference.

Audio Monitoring: The candidate is monitored at intermittent intervals and audio clips are logged for reference.

Live Streaming: Auto proctoring facility ensures live streaming and recording of every test taking place in each test delivery centre.

Geographic Tagging: Tagging real time picture of location where assessment will be done or conducted.

## Technology

Infrastructure required in order to conduct scientific assessments includes computers and a reliable network. This technology has been designed to run on low configuration infrastructure with or without internet access.

## Management

Be it scheduling of assessments, issuing admit cards, accessing scores, downloading reports, analytics, etc. During large scale assessments, our full service model provides a dedicated client servicing manager to manage the same end to end.

## Tablet Delivery Solutions

We offer the comprehensive tablet delivery solution. Not only has the assessment UI been customized to work seamlessly on a tablet, but now we also offer the tablet kit as a part of the complete solution.

Tablets are loaded with host of security features which are bundled with, such as blocking browser access, candidate being photographed while taking the test, user authentication etc. Also, the tests can run even without internet connectivity, using the pre-loaded assessment application.

## **Walk-in Assessments**

Assessments conducted everywhere over the internet so we can Capable of multiple of simultaneous assessments and instantaneous results, the assessments can be used to make quick decisions on-site.

## **Large volume Assessment Delivery**

GLOBAL SOCIETY specializes in large volume assessment delivery. From sourcing candidates to planning of locations and arranging of computer infrastructure, our client solutions team takes full responsibility. The same is followed by inviting candidates, issuing admit cards, deploying manpower, managing crowds, proctoring and result declaration along with email support.

## **Internet Based Delivery**

Our delivery team is capable of providing dedicated servers and URLs to clients. Multilevel role-based authentication allows test administrators, managers and regional managers to keep track of the entire process over our management interface. Integrated email and SMS notifications enable instantaneous access to results and real-time decision making.
